# Driver Onboarding & Lagos Levy – Requirements

Oct 18, 2026 ·

Two rules the app must support in Nigeria: the documents a driver submits to register, and the ₦30 levy added to every Lagos trip. Rules come from Bolt's published Nigeria requirements and must be verified before launch.

## Driver registration: required documents

A driver goes online only after every required document is approved. Admin approves or rejects each file separately, with a reason; the driver re-uploads only the rejected file. Documents 8–9 apply to Lagos drivers only. Uploads: JPG, PNG or PDF.

| # | Document | Applies to | Rule the app must enforce |
|---|---|---|---|
| 1 | National Identification Number (NIN) or other government-issued ID | All drivers | ID number entered and a clear photo of the card uploaded |
| 2 | Driver's license | All drivers | Must be valid; reject if the expiry date has passed |
| 3 | Profile picture | All drivers | Clear photo, face toward the camera |
| 4 | Vehicle photos (exterior and interior) | All drivers | Number plate must be visible in the exterior photo |
| 5 | Vehicle license certificate | All drivers | Photo or PDF upload |
| 6 | Roadworthiness certificate | All drivers | Photo or PDF upload |
| 7 | Proof of ownership or vehicle insurance | All drivers | Photo or PDF upload |
| 8 | LASRRA card | Lagos drivers | Required only when the driver's city is Lagos |
| 9 | LASDRI driver badge or card | Lagos drivers | Required only when the driver's city is Lagos |

## Lagos Road Development Fund Levy

Every Lagos e-hailing trip carries a flat ₦30 levy, paid by the passenger and shown as its own invoice line.

| Item | Requirement |
|---|---|
| Amount | ₦30 per trip, flat (not a percentage of the fare) |
| When it applies | Trips in Lagos State only; no levy elsewhere |
| Who pays | Passenger; added on top of the fare |
| Invoice display | Own line named "Lagos State Road Development Fund Levy" |
| VAT | 0% on the levy line |
| Admin control | Amount and on/off switch editable per state, so a rate change needs no code release |

Example: ₦2,000 fare + ₦30 levy = ₦2,030 total. The levy is not driver earnings or company commission; report it separately.

## Developer notes

- Admin-editable document list per city (7 standard, 2 more for Lagos) and levy per state; no hard-coded values.
- Each document has its own status: pending, approved or rejected.
- Block "go online" until all required documents are approved; flag expired licenses.
- Save the levy amount on each trip, so a rate change never alters old invoices.
- Store uploads privately and mask ID numbers in admin lists.
